# VIVIX-S 1717S

Flat Panel Detector for Digital Radiography

**VIVIX-S 1717S** is a Vieworks' flat panel detector with a large field coverage area of 17" x 17", which is designed for general radiographic application using its unique image processing system and proprietary flat panel detector. The active 9.4Mega-pixel sensor of VIVIX-S ensures superior image quality to meet market demand for precise diagnosis performance, which is made possible by the Vieworks' digital radiographic flat panel detector technology. With automatic exposure detection, Anytime™, VIVIX-S can be used without connection to the X-ray generator. It works just like CR or film as it is triggered by the radiation, instead of a generator interface connection.
